

MR and MRS WEEDON

Through wind, rain, snow and sunshine Mrs Weedon can be seen delivering newspapers with her trusty steed (bicycle) to the Sands and Frog Lane (or should I say hopping along), and very often ably assisted by her husband with his motor car.

I write these words in admiration of the dedication with which these wonderful people go about their task. Not only is it the papers that get delivered. Children are always pleased to see them arrive at the gate, to be given those welcome gifts of sweets.

I have witnessed this with my own two daughters, who are now married and yes, you've guessed it – my grandchildren get the same treatment. Not only do the children benefit, the pets of the canine breed wag their tails with delight knowing there is a biscuit on the way.

I was going about my business when suddenly the penny dropped. How long have they been doing this? The answer is about 30 years, or three decades. PHEW!! God bless them and many thanks.
