## **W.O.D.C. UPDATE**

### **Video link to be set up in library**

THE Council is to install a video link in the library at Milton-under-Wychwood to allow residents to talk face to face with Council staff. The video link, called a Council Access Point (CAP), uses the latest in technology and will be the fourth of its kind that the Council has set up in the district.

CAPs, developed in partnership with Oxfordshire County Council, allow people to talk face to face with the right staff to deal with their particular enquiries just as if they had called in to the Council's offices. They can also send and receive copies of documents through the system. They save people the cost of making a phone call or travelling to Witney and are absolutely free.

They are also very easy to use and step-by-step instructions are on hand.
